ABOUT ME

I'm Rohit — a frontend developer who loves building pixel-perfect, responsive, and high-performing user interfaces. I believe good design isn't just about how it looks, but how it feels — smooth animations, clear layouts, and intuitive flows are my playground.

From crafting expense dashboards to designing full product pages in Next.js, I enjoy the process of turning wireframes (or even just ideas) into beautiful, functional websites. I'm currently levelling up with Framer Motion, component architecture, and real-time data handling using Supabase.

EDUCATION

JEE Main Percentile: **97.16**
MHT-(PCM) PERCENTILE : **97.86**

B.Tech in Computer Science Engineering
VIT Mumbai (Vidyalankar Institute of Technology)
2024 – 2028
Avg. SGPA: 9.44

SKILLS

HTML	REACT JS	TAILWIND CSS
JAVA SCRIPT	NEXT JS	GITHUB
VERCEL	SUPABASE	

PROJECTS

Expense-Tracker
LIVE DEMO

Tech Stack: React.js,Tailwind CSS
Role: Full-Stack Developer (Frontend Focused)

HostelPe
LIVE DEMO

Tech: Next js, Tailwind, Framer Motion,Supabase.

DHostelPe is a modern hostel discovery platform designed to help students find and compare hostels based on location, amenities, pricing, and genuine reviews. With a clean interface and smart filters, HostelPe makes it easy to explore trusted accommodation options near colleges or universities, ensuring a comfortable and informed stay.
